In place of the table in the dining-room was a circular series of red velvet, the column surmounted with a jardinlere holding a thousand exquisite red asters.

From the dining-room the guests passed through the library onto the veranda and then into the art gallery. Lavender, pink and green were combined with rare taste in the library, where punch was served. A cloth of Battenberg covered the table, at either ond of which were candelabra, with stiff bows of pink and green ribbon. Between the candelabra was a flower holder with a dezen or more calla. By cups filled with lavender asters, bowls of the same flowers standing on the book cases about the rooms.

As the guests passed from the library onto the lag veranda, the first glimpse of autumn met their eyes. The pillars of the porch were hidden beneath branches of brilliant autumn leaves, while vases and jardinlers of sunflowers were so arranged on railing and tables as to make it seem almost like a field of the flowers. Japaneses lanterns of odd design covered the electric lamps, while rugs, cusholoss and Indian blankets, combined with the decorations, made the porch one of the most attructive spots of the evening. Rugs and settees were also scattered thickly over to the lawn to the east of the art gallery and here groups of guesta were found throughout the evening. In the art galler, where dancing was enjoyed, the decovations were also beautiful. Falms and ferns formed a low screen in front of the stage where the musicians sat. In the center of the room was a round table holding a great block of ire. She saw the business-like, uncompromising attitude of the uncle to whom the boy had been left as a legacy by his dying mother. The wealthy bachelor had given freely of his money, but not of his sympathy. He had made no effort to understand the boy, to establish intimate relations with him. If teachers and tutors had said that the boy was lazy, or indifferent, he had accepted the criticism without question. She was morally cerent, he had accepted the criticism without question. She was morally certain he had never looked into those luminous brown eyes and read the

truth.
On the fifth day after he arrived at the hospital she received a letter:
"Dear Madam:—Mr. Grimm has received word that his nephew, John Stanton, is confined to your hospital with typhoid fever. He requests that you spare no expense to make him comfortable, and to bring about his ultimate recovery. Kindly render a weekmate recovery. Kindly render a weekly statement to Mr. Grimm and notify him if we can ship anything that will make John more comfortable, or that will expedite his recovery."

The signature was the name of Mr.

The signature was the name of Mr. Grimm's secretary.

Miss Kent laid down the letter and frowned at an engraving of Esculapius which hung over her desk. She could see the man of business, in his richly-appointed office, turning from his telephone long enough to give the secretary some curt directions. She could also see—and the memory of that sight brought a queer choking sensation in her throat—Jack Stanton's eager face her throat-Jack Stanton's eager face each day when the mail was being dis-

'Any line from the governor?" Marion Kent gave the mail to an-other nurse to distribute, and then she sat down to her desk. It took her a long time to frame the letter she had decided to write. She wrote it in lead pencil, crasing and interlining, and then copied it. She set the stamp upon the envelope with a triumphant uplifting of her head. Something told her that this letter would make Henry Grimm,

the window where the joyous spring sunlight was dancing on the roofs of skyscrapers. It seemed as if a sudden, new light had flooded the eyrle in which Henry Grimm had been content at the game of making money, and more money. He read the letter again. Then he laid it down and learned back in his game of making money, and more money. He read the letter again. Then he laid it down and leaned back in his chair. It was a womanly letter, but it carried a certain force of character in every gentle phrase. And after reading it the third time Henry Grimm wrote to the nephew. He did not even dictate the letter to his secretary, but wrote it long-hand. Oddly enough, at the same hour, the very next morning, he found himself at the same task. The answers to these letters came in her answers to these letters came in her handwriting, but they bubbled over with the boylsh expressions of the patient to whom the mail hour was now the happlest of the day. Then the tenor of the letters was

changed. There were only daily reports from Miss Kent, setting forth the trifling variations of temperature and

respirations. Young Stanton was wan-dering in the land of delirium. It was only natural that Miss Kent should write a few words of comfort to the now anxious man, and equally natural that he should watch for those dally crumbs of comfort, but his secretary was amazed when the man of af-fairs suddenly announced that he was going South. Miss Kent had written that they expected the crisis in forty-

Mr. Grimm leaned back in the chair of the parlor car and closed his eyes. "Of course he will get well. He's been keeping up this gait ever since his first degree of measles. Young Stanton had been carried out Young Stanton had been carried out on the convalescents' porch. He was waiting for his uncle, who had gone down to White Sulphur Springs for a week's stay. 'I say, governor,' he said, when Mr. Grimm had finished his account of his trip, "don't you think we could fix it so that Miss Kent could have a little vacation. She looks awfully tired. I think we could fix it on the score that I need her to take care of me on the trip."
